

Settings

(Document No: 5.11.3)

Settings will provide user to update his password And to change the privacy of his account.

Change Password:

Here user can change his password by filling the fields given in form. Once he fill the form system will authenticate the user throw his old password.

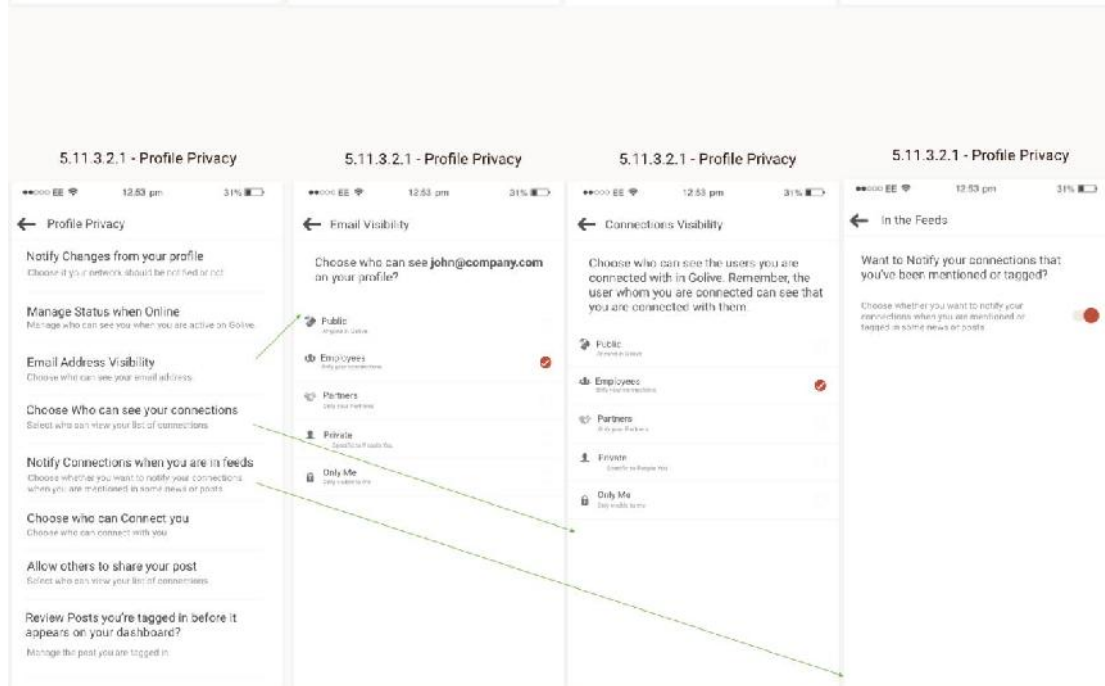

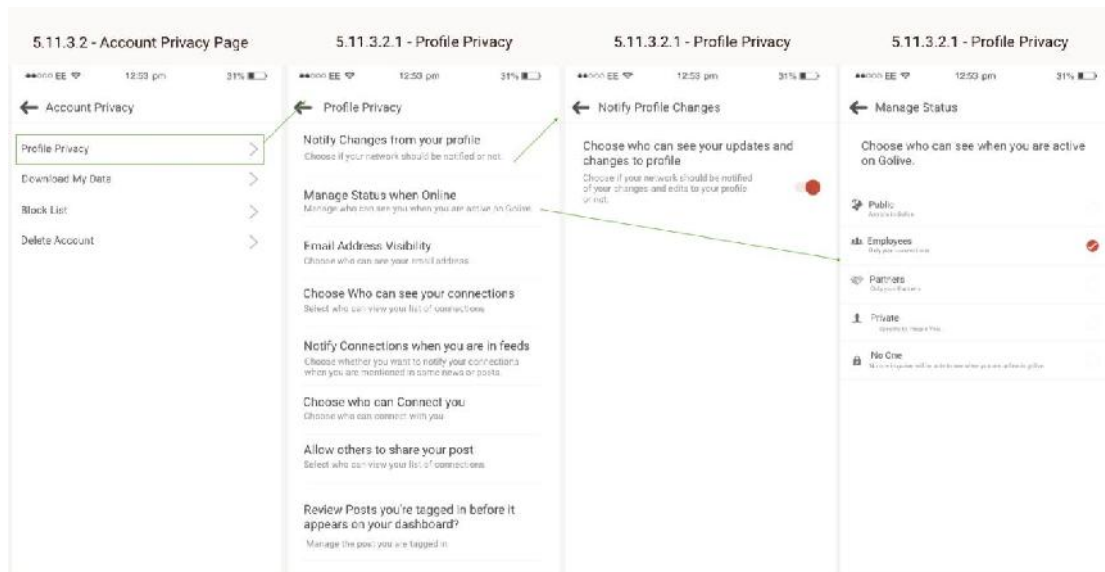

For changing Password user needs to follow below things

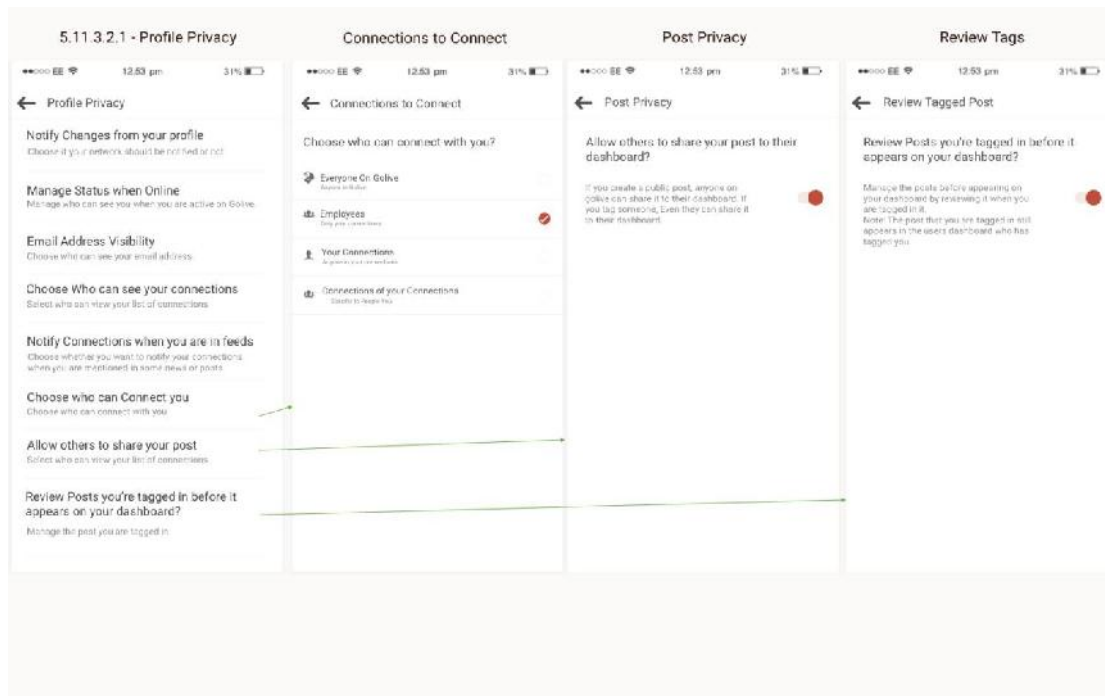

- Password should include both lower and upper case characters.
- It should have at least 1 number and symbol.
- New Password & Confirm password should be same.

Account Privacy:

Here user can set his privacy related to his data, posts, Connections etc. Account privacy have following categories.

- Profile Privacy
- Download My Data
- Block List
- Delete Account

Profile privacy:

Profile privacy have the following subcategories.

➤ **Notify Changes from your profile:**

Ask user whether his network should be notified of his changes and edits to his profile or not.

➤ **Manage Status when Online:**

who can see when user is active on Golive. user will select from given options(Employees, Public, Partners, Private, No One) And click on check button according to his requirement.

➤ **Email Address Visibility:**

who can see user Mail ID on profile. user will select from given options(Employees, Public, Partners, Private, Only Me) And click on check button according to his requirement.

➤ **Choose Who can see your connections:**

who can see the user connections on his profile. user will select from given options (Employees, Public, Partners, Private, Only Me) And click on check button according to his requirement.

➤ **Notify Connections when you are in feeds:**

Here user have to select whether they want to notify his connection that they are tagged in their connection posts or news.

➤ **Choose who can connect with you:**

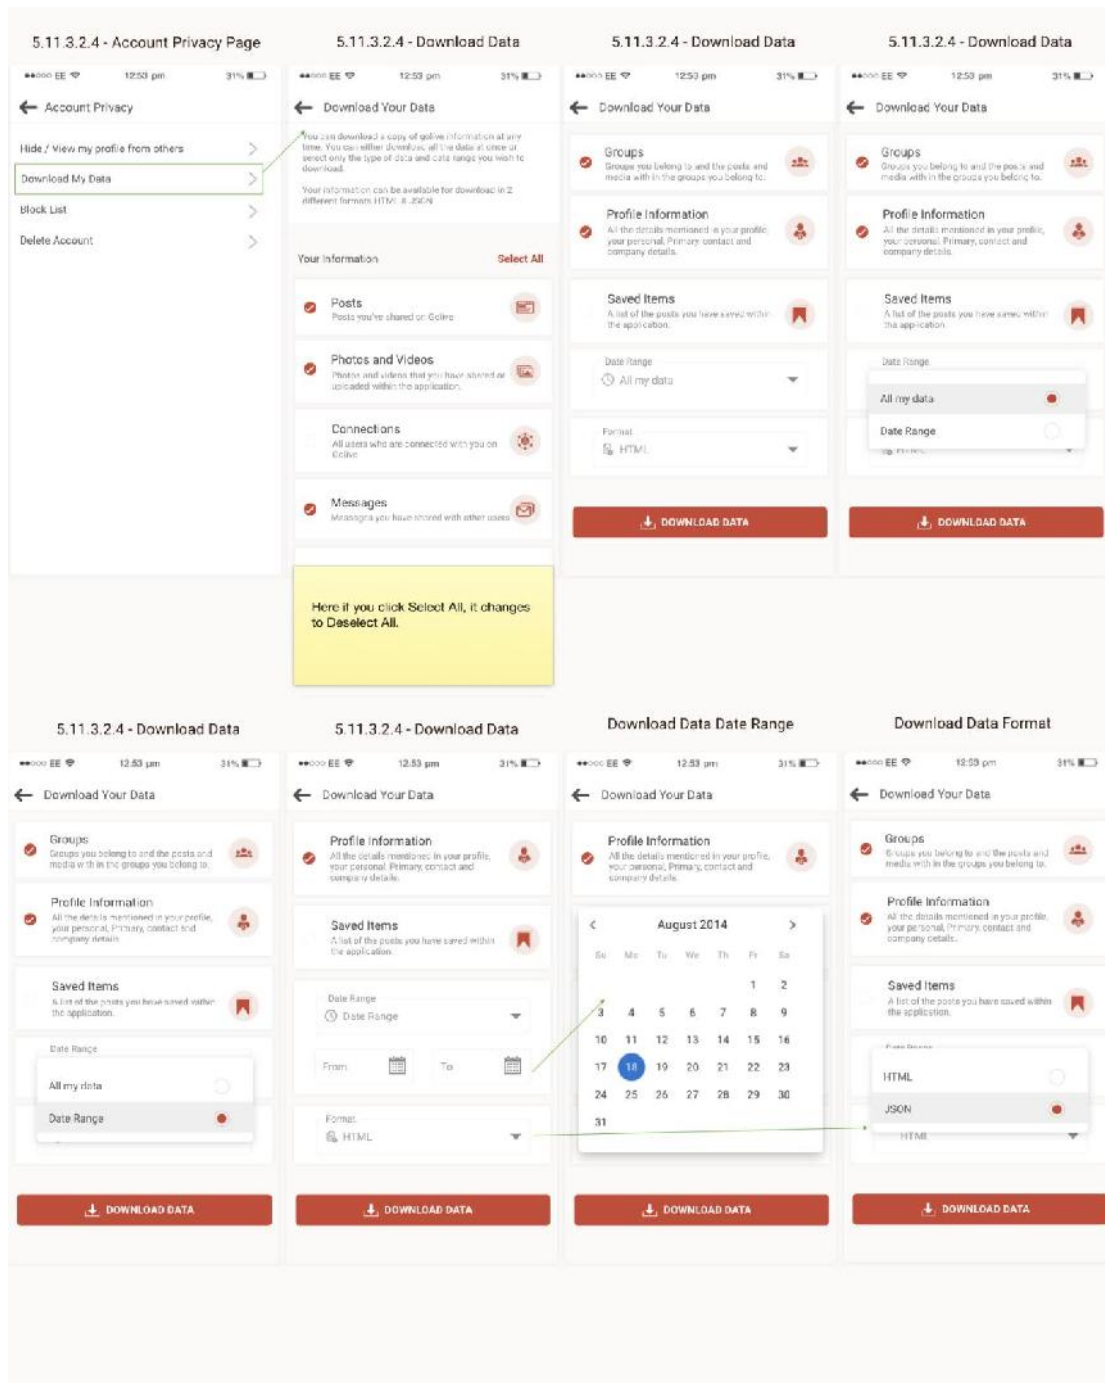

Here we ask user to whom he want to allow to send connection request to him. user will select from given options (Everyone On Golive, Employees, Connections of your Connections) And click on check button according to his requirement.

➤ **Allow others to share your post:**

Here User can allow to their connection to share his posts on their own dashboard

➤ **Review Posts you're tagged in before it appears on your dashboard:**

Here user will ask about whether they want to reviewing it when they are tagged in other posts.

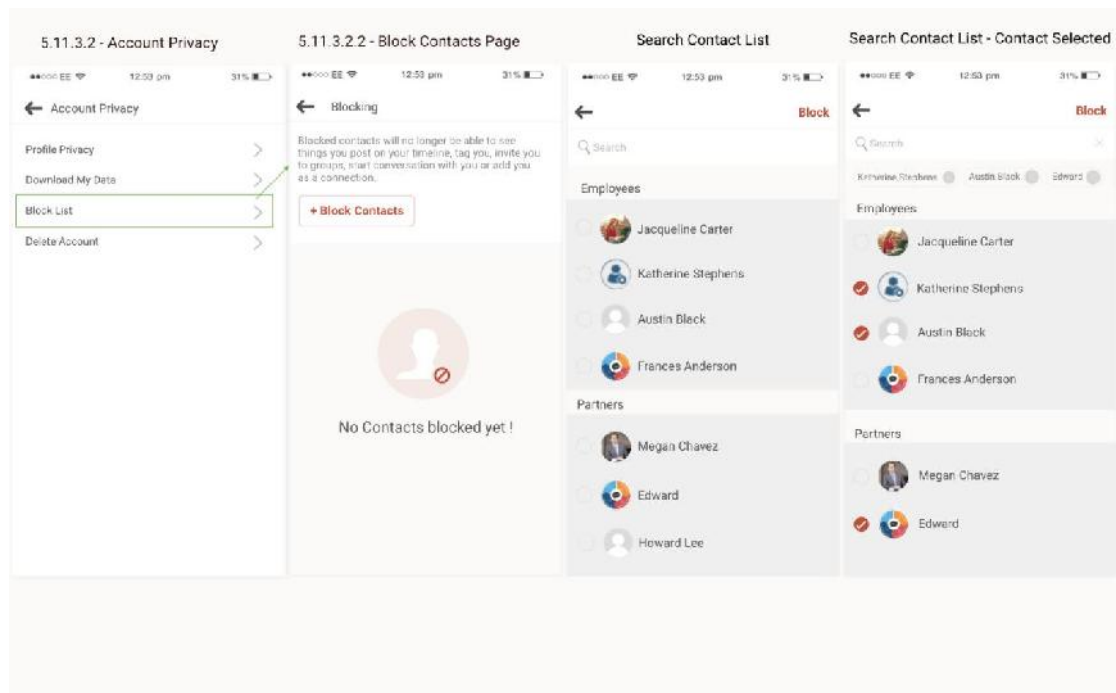

Download My Data:

Here user can download a copy of Golive information at any time. they can either download all the data at once or select only the type of data and date range they wish to download. User information can be available for download in 2 different formats HTML & JSON.

User have to select the fields to download like posts, Photo, Video etc after selecting then they choose whether they want all data or between a date range if they select

date range then select the date and format of data download and then click on download it will download to local storage of the user.

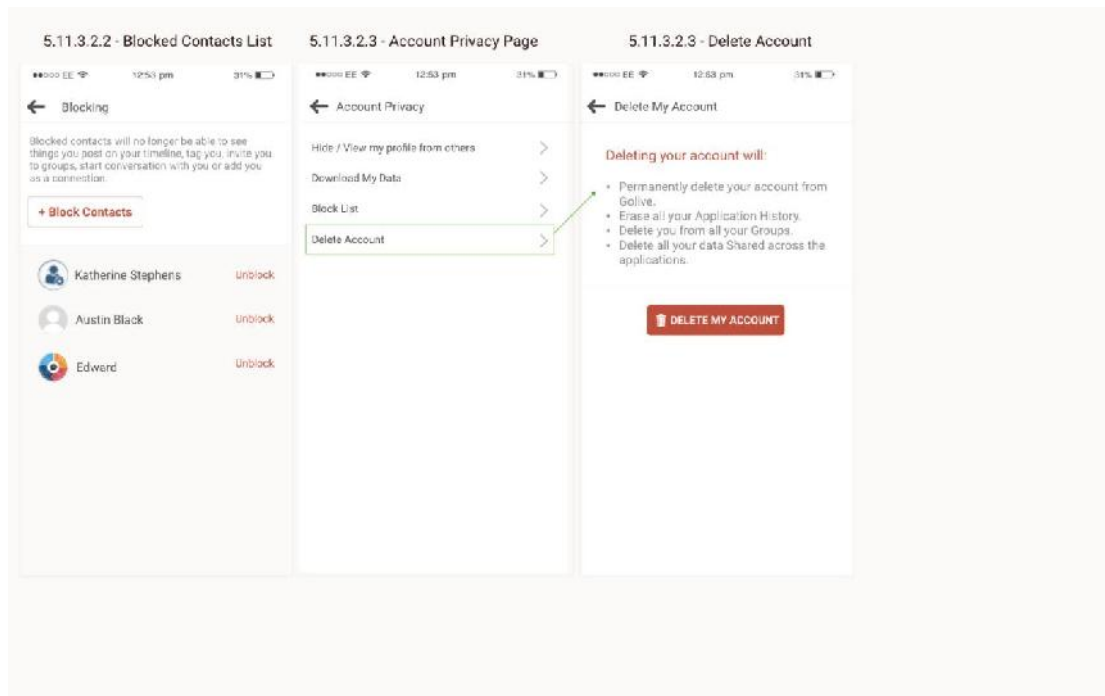

Block List:

Here user can block his connections so that blocked contacts will no longer be able to see user post on his timeline, tag user, invite user to groups, start conversation with user or add as a connection.

When user go to block list he can see all blocked connections & to select someone to block he can click on +Block Contacts button then user will get list of his connection from there he can select the connection to whom they want to block after selecting just click on block button and blocked list will be updated.

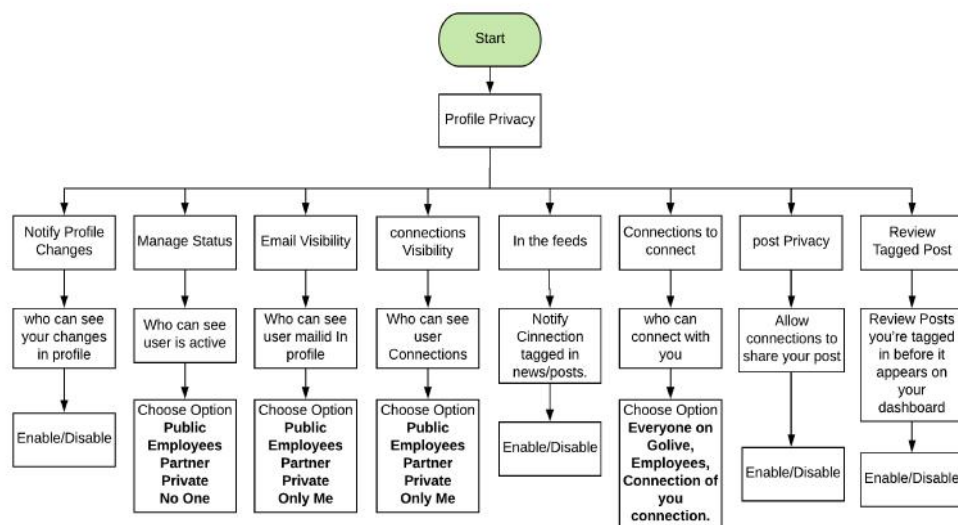

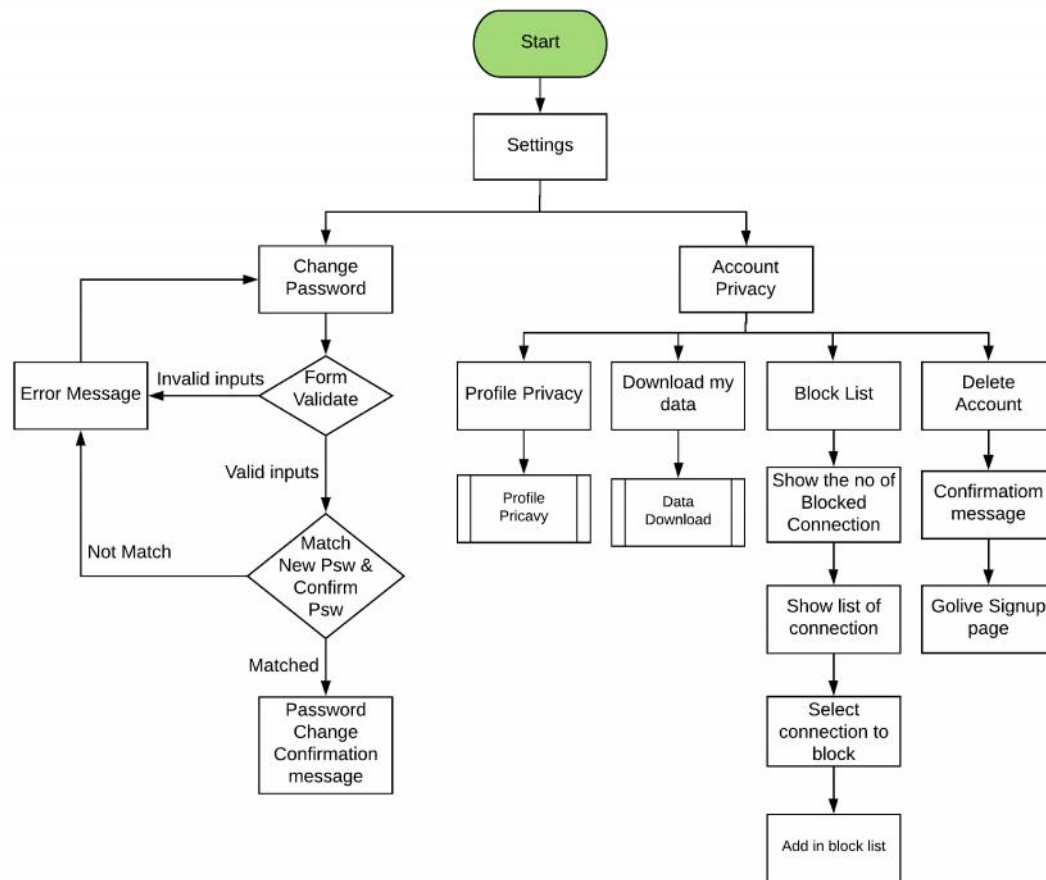

User can also unblock the connection from the blocked list by clicking unblock button.

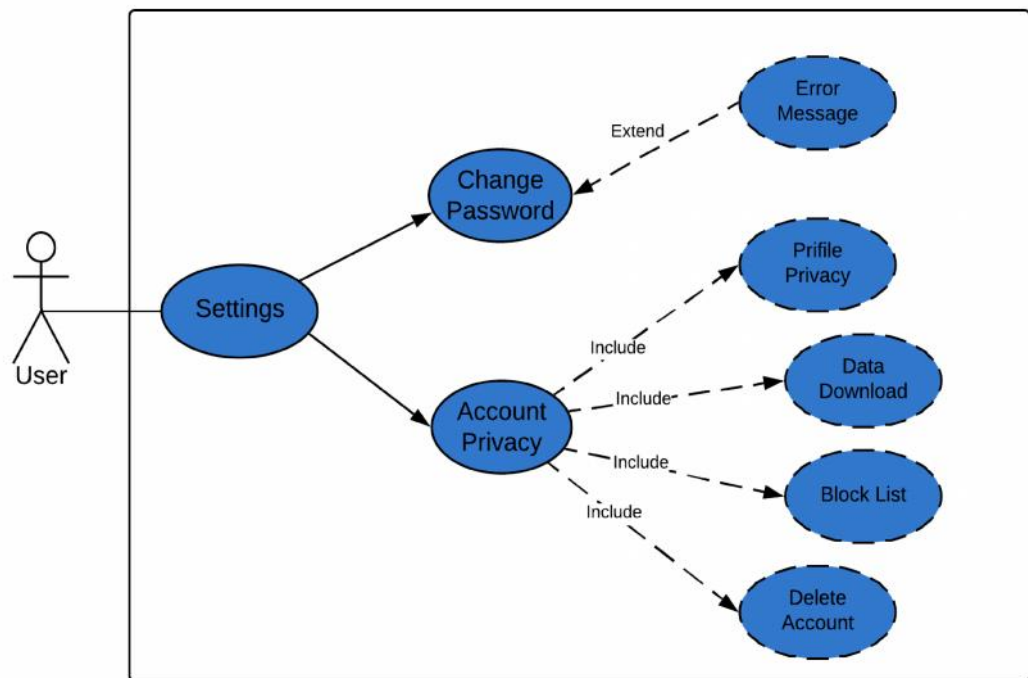

Delete Account:

Delete Account provide user to delete his account permanently from Go live, it will also erase the full data of the user & delete him from all the groups. It also deletes the user shared data with other on Go live.
