5.15.5.1.1- Access Permissions after Approving

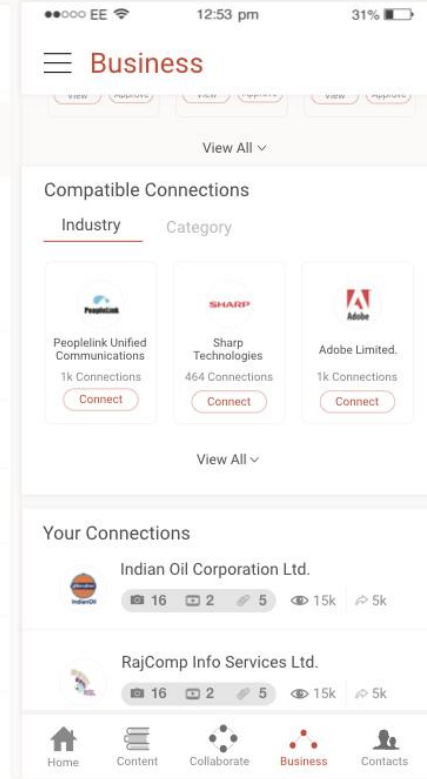

5.15.5.1.1 - Add Contacts

5.15.5.1.1 - Add Contacts

5.15.5.2 & 5.15.5.3- Compatible & Your Connections

In Business user can connect to different no. Of OEM that help them to spread there network. When user click on business they will get list of compatible Connection then Recommended Connection & then There connection list.

A user can select OEM and connect with them in 2 ways which is

➤ **Single relation**

In single relation a user can connect to OEM with single relation like Partner, Distributor, Seller etc. They can select any one of them.

➤ **Multiple relations**

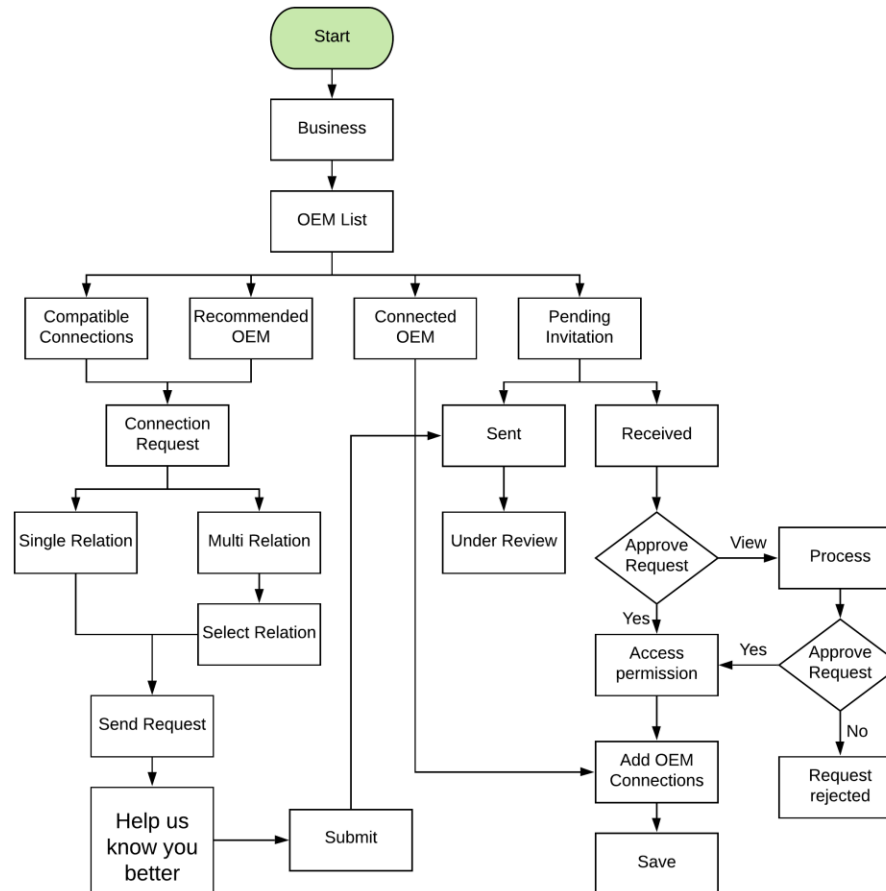

In Multiple relation a user can connect to OEM with multiple relation like Partner, Distributor, Seller etc. & he can also become customer for that OEM. They can select multiple at a time.

Once the user will select the relation with OEM then they can send request to that OEM. After that they have fill some basic information like name, business etc. And after it will go to pending request where they can see the status of their request.

In Pending Invitations user will get the sent & received request status. Once a user will approve the request of some one then they will set the access permission for that user and after setting that user can see the contact of that user and even they can add them.

User can see added OEM in his connection list of business page & from there they can access that OEM page.
