Users can See the contents on there OEM by clicking on content icon. If a user don't have a single OEM in his connection then they are going to see gamification by default & if they have one or more OEM connection so on the basis of that OEM they will get the content.

User can Also Sort the content according to there requirement, The following categories are given to sort content

➢ **Company**

Here user can see all the OEM list with whom they are connected.

For ex - User Organization, Cisco, Polycom, Sharp

User can select the OEM from the given list and see there data.

➢ **Type**

Here user can select the type of content they want see. They can select from the list given to them. like

✧ All

✧ Document

✧ Video

✧ Audio

➢ **Category**

Here user can sort on the basis of document category provided by the OEM's. User will have no. Of options like Customer on site videos, Training Videos, Solutions Document etc. From that they can select multiple options.

➢ **Industry**

Here user have to select the industry type to sort the content he want in Golive no of industry type available like BFSI, Retail, Governance, Enterprises, Health care etc.

The option can vary based on User connected to the OEM's
