Dashboard (Posts)

(Document No: **5.7.4**)

5.7.1.1.4 - Post Submitted and Viewed in dashboard

After Posting it goes to Dashboard Page with post added in the news feed.

5.7.1.1.4 - Post Submitted and Viewed in dashboard

5.7.1.1.4 - Post Submitted and Viewed in dashboard

On single click on "LIKE" button, it should get liked but if On Long Press of "LiIKE" Button the options will open.

5.7.1.1.4 - Post Submitted and Viewed in dashboard

Once liked, we will get the like button highlighted and on the top shows the No. Of Likes and congratulations

5.7.1.1.4 - Post status for reactions

On click of the these icons, open the reactions page to see detailed information of actions.

5.7.1.1.4 - Detailed reactions for all

5.7.1.1.4 - Detailed reactions for Likes

5.7.1.1.4 - Detailed reactions for Congratulations

5.7.1.1.4 - Personal Post has

5.7.1.1.4 - Options On Personal post

5.7.1.1.4 - Post from OEM

5.7.1.1.4 - Options on OEM Post

On our personal post, if Click on this options, we can slide up the options for edit delete, save and copy link and the other part of the screen will become overlayed.
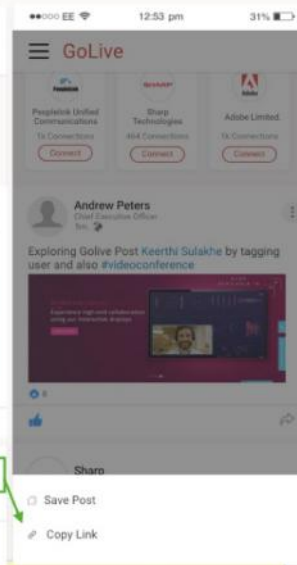

If it is any other post from any group, oem or any other source which is not our personal post, we can only see save & Copy link options.
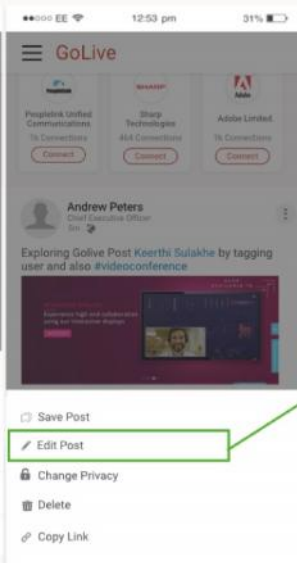

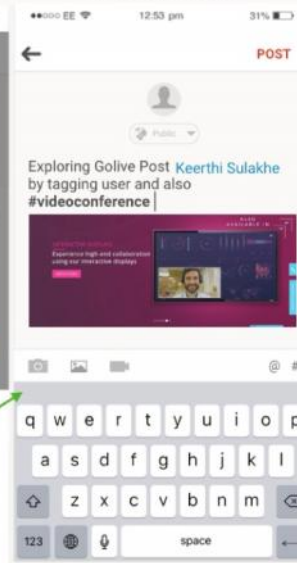

5.7.1.1.4 - Options On Personal post

## 5.7.1.1.4 - If Change Privacy Selected

5.7.1.1.4 - Options On Personal post

5.7.1.1.4 - Becomes editable mode in create post page

5.7.1.1.4 - Company Post

5.7.1.1.4 - Post shared from dashboard

5.7.1.1.4 - After posting the shared post

5.7.1.1.4 - If on others post

Show Connect button if OEM is not in our connections.

If we find any post shared by someone else in the feed with re-shared OEM post and if we don't have that OEM under our connection then show "CONNECT" button in the post.

Any post when clicked on share button opens up in a create post page with post attached.

When a post is re shared from others post, the media icons will be disabled.

After the posts are created you can view them in dashboard. You can also see the posts of your connections in dashboard by scrolling them. Every time you open your dashboard you will see the recently added post on the top.

There are many things a user can do with posts that are as follow.

- **Reactions**
- **Post options**
- **Share posts**
- **Connect**

Reactions:

A user is able to give reaction to the posts by like icon given below posts. If he clicks single time, then they liked the posts and if they hold for 2 secs they can give other reaction also from reactions popup.

Even a user can see reacted people of that post, he just need to click the reactions count below posts and then user move to reaction page where he can see different reaction given by the people and who is given what reaction.

Post options:

A user has many option on post based on owner of the post. If that post is his own, then he will get more option related to post and if it is from other then user have less option for the post like save the post and copy link.

- **Save Post:** It will save the post in the user account
- **Edit Post:** It will allow user to edit his post like change the attachment or change the content.
- **Change Privacy:** Allow user to change the privacy of the post
- **Delete:** Delete the post for the user
- **Copy Link:** Allow user to copy the link of the post to clipboard so they can share the link other.

NOTE: For other connection post user can only save the post and copy the link of the post
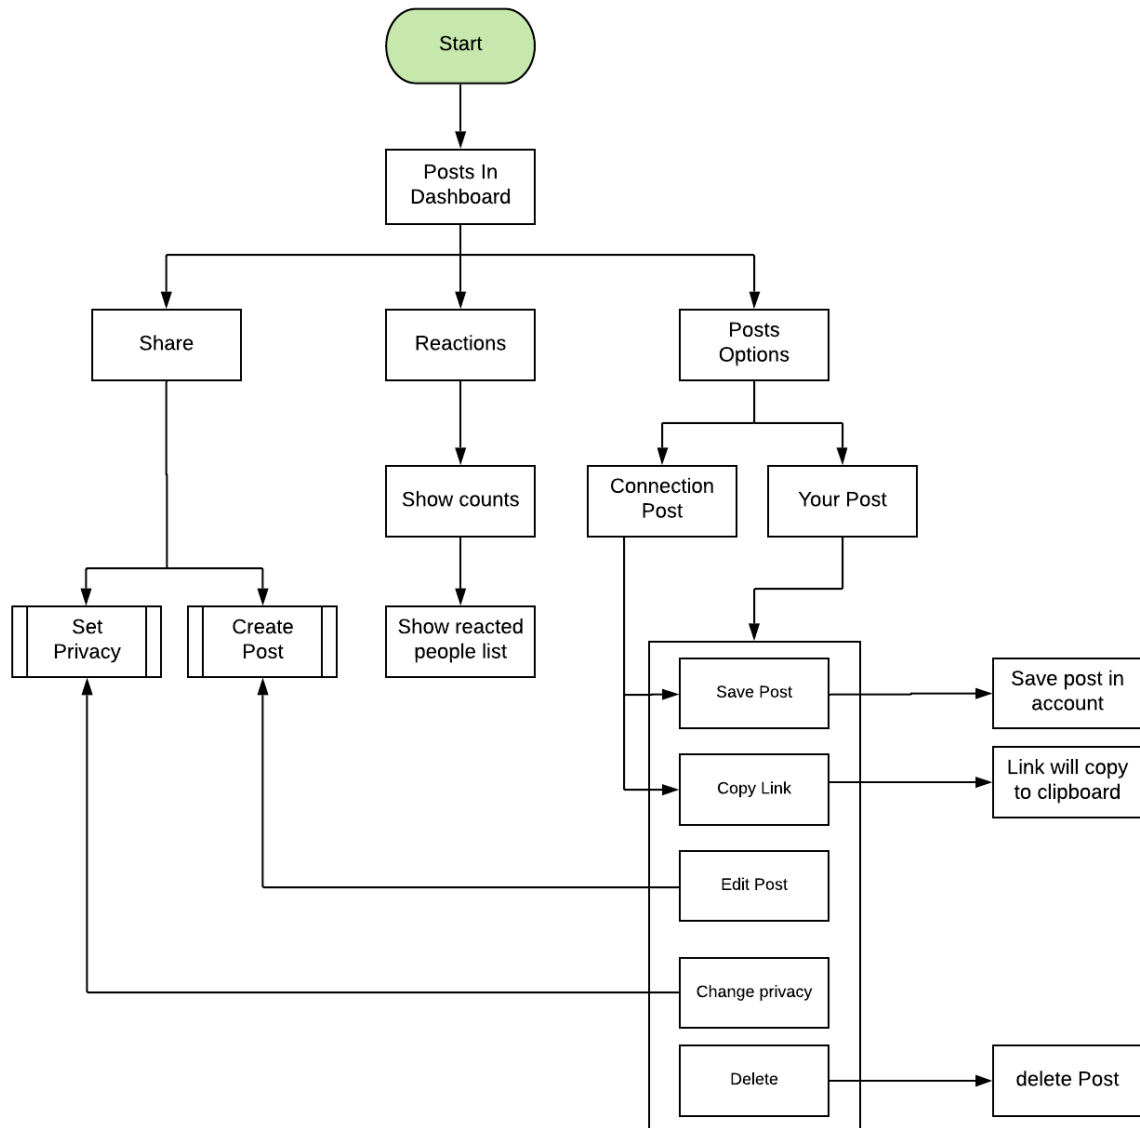

Share Post:

User can share the other user post as its own by click on share icon. Once the share icon clicked user directed to share post page where he wants to select the privacy of the post and add the content on it if they want.

They can tag people or tag keywords on post but can't attach any file in it like image or video.
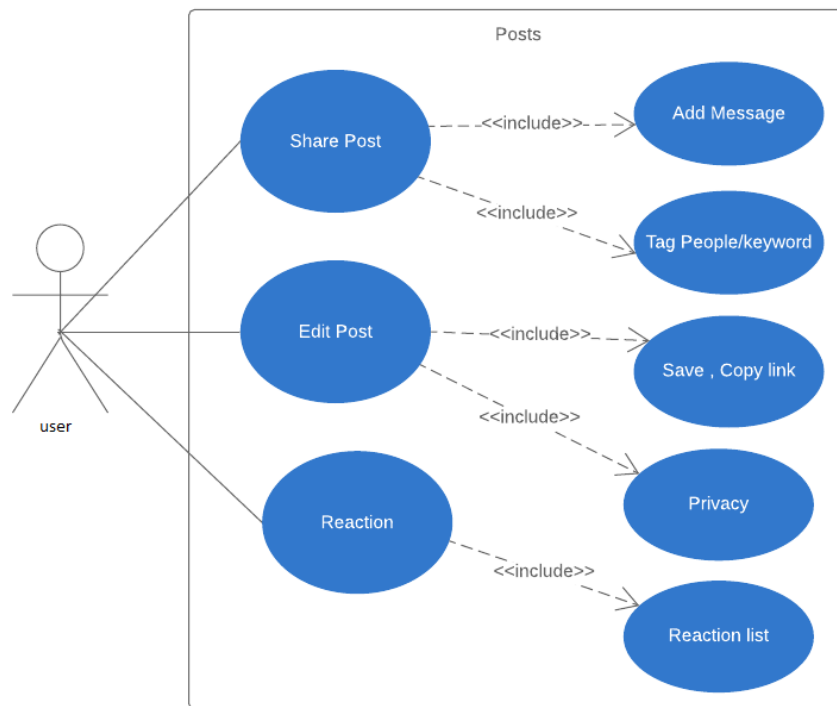

Connect:

If you see a post of a user who is not connected to you then you can send the connection request to that user by clicking connect button on right top corner of the post. Which will send connection request to that user.

Dashboard (Recommendations)

(Document No: **5.7.5**)

5.7.5 - Recommendations

NOTE 1:
For any user, This recommendations will appear based on the " INDUSTRY TYPE" selected by the user while signing up a company form.

NOTE 2:
If the user has more than 10 OEM Connections to their account, the system should hide the "Recommendations" to the user.

NOTE 3:
If the user is already connected to any OEM, that OEM should not be visible in recommendations.

Recommendations will be appearing based on the user selected industry type in company form at signing up time. If user have more than 10 OEM connection based on industry type, then no need to show the recommendation to the user.

User should not get the recommendation of OEM from which he already connected to it should not match the connected OEM and other OEM.
